

Environmental

NESPAK believes and strives hard to be an environmental friendly organization by adopting safe environmental working and management practices in its day to day activities.

NESPAK while providing its consulting services to clients, practices strict compliance with all national environmental laws so as to prevent environmental pollution and degradation. Improvements in performance and compliance are sustained through well established environmental management system.

NESPAK endeavours to control and minimize the risk to the environment resulting from its services through the policy of training its personnel and deploying company resources to develop and establish environmental friendly working environment. Similarly, it is ensured that all work done by the contractors at project sites under NESPAK supervision is in compliance with the country's environmental laws and good practices.

The Management of **NESPAK** is overall responsible for the implementation of environmentally sustainable management system. The Management is responsible for enacting this policy and giving it equal priority with all other businesses.

NESPAK ensures environmental awareness and compliance by its own staff as well as the contractor's staff at site.

Thus, **NESPAK** is committed to protect the environment and its sustainability.
