

ENVIRONMENTAL POLICY

NESPAK believes and strives hard to maintain its status as an environmental friendly organization by adopting safe environmental working and management practices in its day-to-day activities.

NESPAK while providing its consulting services to clients, practices strict compliance with all national environmental laws so as to prevent environmental pollution and degradation. Improvement in performance and compliance is sustained through a well established environmental management system.

NESPAK endeavours to control and minimize the risk to the environment resulting from its services through the policy of training its personnel and deploying company resources to develop and establish environment-friendly workplaces. Similarly, it is ensured that all work done by the Contractors at project sites under **NESPAK** supervision is in compliance with the country's environmental laws and good practices.

The Management of **NESPAK** is overall responsible for the implementation of environmentally sustainable management system. The Management is responsible for enacting this policy and giving it equal priority along with all other businesses.

NESPAK ensures environmental awareness and compliance by its own staff as well as the contractor's staff at sites. Thus, **NESPAK** is committed to protecting the environment and its sustainability.

Muhammad Zargham Eshaq Khan
